

## List Pegged Wheat Prices

Fixed minimum prices, which will be guaranteed western growers by the Canadian Wheat Board on grades other than No. 1 Northern (already fixed at 80 cents a bushel), were approved by the Dominion government on recommendation of the board.

The grades and prices announced by Prime Minister Mackenzie King are as follows:

No. 1 hard 81 cents; No. 2 Northern 77; No. 3 Northern 74; No. 4 Northern 69; No. 5 wheat 61½; No. 6 wheat 54½; feed wheat 48.

No. 1 C.W. Garnet 72; No. 2 C.W. Garnet 69; No. 3 C.W. Garnet 64

## Junior Wheat Club Field Crop Results

The following is the standing of the Didsbury Junior Wheat Club members in the Standing Crop Competition:

Henry Brown	84
Leslie Evans	76
Harold Burns	75
Colin Hogg	73
Murdo Campbell	72
Arthur StClair	71
John Bruce	71
Edward Topley	70.5

## Rugby Community Opens Hall

Favored with fine weather, the opening of the Rugby Community Hall, 12 miles west of Didsbury on Friday last was a great success and it certainly shows what a fine community spirit can accomplish.

Last December the boys of the district went back nearly 20 miles west and cut the logs, one member lent his saw-mill, another loaded up his tractor and took it back for power. The logs were sawn, and the lumber hauled to the building site, a planer was secured and the lumber planed and piled ready for use.

After seeding was finished, work was commenced, and under the direction of Mr. Romyn, head carpenter, the boys were kept busy for many weeks and are certainly to be congratulated on the erection of such a fine building.

At six o'clock doors were opened and some 250 guests were served a chicken supper by the ladies of the district. After supper, with a few well chosen words, Mr. Archie Boyce officially declared the hall open and a short musical programme followed, the floor was then cleared and to the strains of the "Hill Billies" music, dancing was indulged in to the "wee sma' hours."

We hope that the hall will be a credit to the community for many years, and may we also add that the thanks of the community is due to all those who in any way helped to make the day a success.

## Didsbury Easily Wins Tournament

Didsbury softball boys showed their superiority on Wednesday last when they easily won the softball tournament at Innisfail.

Holub was the outstanding man on the team when he pitched two and a half games and in the finals against Lacombe he got fifteen strikeouts with twenty-one men to bat and shut the team out without a score.

During the series Haldane made three home runs and Holub made one.

In the first game they beat Bowden with a score of eight to six and got the best of Louisana in the second by fourteen to seven. In the final they really went to bat and shut out the Lacombe team by a score of twenty-one to zero.

Jay Tuggle, the catcher, had to retire on account of an injured finger in the first game and Len Berscht took his place for the remainder of the games.

Didsbury line up: Holub, Len Berscht, Jay Tuggle, Morasch, Haldane, V. Morrison, Fred Evans, E. Morrison, Ron Brightman, Ray Shantz, Ian Grant.

Coach: Chubby Scott

## Change Season For Ducks, Geese etc.

The National Parks Service of the Department of Mines and Resources, Ottawa, has just issued the Regulations regarding Migratory Birds for the current year.

A summary of the regulations as they apply to Alberta follows:

### OPEN SEASONS

Both Dates Inclusive

Ducks, Geese, Rails, Coots and Wilson's or Jack-snipe

In that part of Alberta lying north of a line commencing at the intersection of the centre line of the Canadian Pacific Railway with the east boundary of the province near the town of Compeer at township thirty-three, range one, west of Fourth meridian; thence westerly along the centre line of said railway to the town of Lacombe and southerly to the town of Red Deer thence westerly along the centre line of the Canadian National Railway to the right bank (going down stream) of Saskatchewan river near Rocky Mountain House; thence up stream along the said right bank and the right bank of the middle fork of the Saskatchewan river to the source of the latter stream at Snow Peak on the western boundary of Alberta in township thirty-three, range twenty-one, west of Fifth meridian: From 12 o'clock mid-day September 15th to sundown November 15th.

In that part of the Province of Alberta lying south of the line defined in the preceding paragraph: From 12 o'clock mid-day October 1 to sundown November 30

There is a closed season throughout the year on Eider Ducks, Wood Ducks, Swans, Cranes, Curlew and all the shore birds not provided with an open season in above schedule.

### BAG LIMITS

Ducks 12 in any day, Geese 5 in any day, Coots and Rails 25 in any day, Wilson's or Jack-snipe 25 in any day and not more than 100 Ducks or more than 25 Geese, or more than 100 Rails and Coots in the aggregate in one season.

The use of automatic (auto-loading) guns unless the magazine has been permanently plugged or altered so that it cannot carry more than one cartridge; or rifle; or shot-gun loaded with a single bullet, or any gun larger than number 10 gauge is prohibited.

## Gun Club Holds Annual Shoot

The annual shoot for the Turvey Cup was held at the Butte on Wednesday, August 10th. The trophy was won by the club's youngest member, Leo Weige, who made the highest score ever made in any shoot of the Didsbury Club.

Fifty shots were fired at the clay pigeons and the following were the scores: Leo Weige 45; Irwin Klein 41; Jim Caithness 38; Ken McCoy 31; Ed Watkin 30; J. Chamberlain 29.

## Melvin Wins Cup.

The final game in the Bush Baseball League was played at Melvin on Sunday when Melvin took the cup by defeating Dogpound by a score of 8-2.

The teams broke even in the first inning with one score each but Dogpound led in the second 2-1. The game was tight to the fifth but Melvin broke away, making two runs in each of the sixth and seventh, and three in the eighth.

Elmer Heinie pitched a bang up game and gained good support. He made twelve strike outs.

Owing to the absence of the president of the league, Mr. Parsons, the cup was presented by Mr. H. J. Steckley.

After receiving many congratulations, the Melvin team drove into Didsbury and had supper at the American Cafe.

## Evangelical Church Notes

The morning subject next Lord's Day is, "Jesus the Bread of Life," and in the evening the subject is, "Character and Strength." Let none get so busy at this season that there is no time for Church.

## Knox United Church Notes.

The services next Sunday will be in charge of the minister, who will deal with the topic, "Accept No Substitutes." A cordial invitation is given to all. The services in the country will be as follows:

Westerdale at 2:00 p.m.

Westcott at 4:00 p.m.

We would like to remind the Sunday School scholars that the sessions of Sunday School are still being continued. Those who are not away on vacation are urged to be present next Sunday morning at the usual hour.

## Hail Damage Rugby District

There was some hail damage reported in the Rugby district on Monday evening. The damage does not appear to be widespread but J. Hosegood and H. Luft report damage up to 50 or 60 percent.

## Canadian Legion Notes

At the last regular meeting of the Legion, September 11th was set as the date for the Annual Commemoration Service. The Service will be held at the Memorial at three p.m.

After the business meeting Rev. Caughell gave a very interesting address on Palestine, telling of his experiences while visiting that country a few years ago. The pictures shown were very descriptive and the members present, with the Scouts and Cubs enjoyed the talk and pictures. "J. D." says the evening brought memories back of the two years he was out there.

On Wednesday last the Annual Picnic was held at the Little Red. Although the attendance was not so large as in former years all present enjoyed themselves.

In the softball game, the Old Swans were winners over The Young Folk by a narrow margin.

## Vanishing Wealth

Whatever may be thought of their proposal that the administration of the natural resources of the country revert to the Dominion government, the statements of the Federation of Ontario Naturalists, in their brief to the Royal Commission on Dominion-provincial relations may well give pause for reflection and serious consideration.

Whether or not one agrees that the remedy for existing conditions lies in their principal recommendation, namely that of vesting the control of the resources in the Dominion government, the country at large owes a debt to the Federation for its timely note of alarm which was sounded when the organization drew to the Commission's attention, in no uncertain terms, the profligacy with which the resources are being dissipated for immediate gain with little or no thought for anything like commensurate measures to ensure their conservation or replacement.

One has only to read the brief to be strongly impressed with the necessity for sterner measures to ensure conservation of this great heritage if the present generation is not to be deprived of many of the advantages, economic and aesthetic, which the ownership of such resources brings and if posterity is not to be entirely stripped.

### Startling Losses

That great wastage of a precious inheritance has not only been allowed in the past but is still being practised to the detriment, present and future, of the entire country, is brought home with realistic force. The evidence is writ large on the pages of the brief and the statements cannot well be refuted.

Figures quoted indicate appalling losses to the country as a result of wasteful methods of agriculture and lumbering, resulting in depletion of water supply, seasonal floodings with resultant loss of moisture when most needed, followed by soil erosion supplemented by further losses to valuable stands of timber from forest fires.

The forest area burned in Canada during 1936 totalled over three million acres, or 4,500 square miles. When added to this is the large amount of timber which is being cut down annually for the lumbering industry, the pulpwood industry, for fuel and for other purposes with comparatively no provision for replacement, one may well wonder how much longer these valuable resources will continue to be available and what the effect such continued losses are going to have on the future revenue of the Dominion, on the welfare of that basic industry—agriculture and, in general, on the happiness and prosperity of the people.

### Impoverishing The Soil

"It should be remembered," very aptly says the Federation, "that repeated fires throughout large areas of Canada where the soil is thin cause its destruction and make the possibility of future crops of trees on such areas a remote one for hundreds of years to come; the enormous tracts of almost bare rock to be found in many parts of the Dominion are mute evidence of the washing or blowing away of such soil which took centuries to form and which once bore a forest of permanent revenue-producing possibilities."

Not only does the extravagant denudation of the forest resources result in a serious loss to agriculture through impoverishment of the soil, and the drying up of the water supply, but it also spells disappearance of other valuable resources and the desecration of industries upon which they are based. With forest coverage and food sources gone and running water depleted, the rapid disappearance of wild life such as the fur-bearing animals, once a source of great revenue; the wild fowl, a source of attraction for visiting and native sportsmen and the fish, also a great attraction for tourists and the basis of another of the country's industries, are but a matter of time, and for some of them, not a very long time.

"In recent years," again quoting the Federation's brief, "the plight of some of our wildlife has become desperate. This is especially true in the case of waterfowl which, depleted by overshooting, have been reduced to very low numbers through drought in their nesting grounds on the prairies. The Eskimo curlew, Labrador duck, passenger pigeon and great auk are now totally extinct, and fear for the continued existence of several species of wildfowl, for the maskinonge and the moose are widely expressed."

It might also be pointed out that the chestnut, one of the most beautiful, useful and valuable trees is practically extinct in the United States and Canada and that the disappearance of the Douglas fir in 15 years and the white pine in 30 years is predicted by authorities.

### What Others Say

What authorities in other countries think of our profligacy and wasteful methods may be summarized in a statement made in 1923 by Professor Troup, head of the Imperial Forestry Institute at Oxford, England, who is well conversant with protective measures adopted in his own and other European countries, when he said:

"I was frankly amazed, as were many of my colleagues, at the extent to which the forest had been destroyed with little or no attempt at regeneration. Whoever may have been responsible for this state of affairs in the past, the Dominion and provincial governments cannot now plead that they have not had fair warning as to what will happen if this policy continues. I am in full agreement as to the necessity for research into soil problems and silviculture in relation to logging practice to secure natural regeneration and sustained yield."

In the light of the statements made to the Royal Commission, the undisputed figures in support of the contentions made and the evidence of authorities, national and international, it would seem that something more ought to be done about it than is now being done.

### Saddest Man In Tokyo

#### Citizens Claim Admiral Okeda Has Disgraced The Emperor

Admiral Okeda, who was Prime Minister of Japan two years ago, is the saddest man in Tokyo to-day. In 1936 a group of Japanese, intent upon a coup d'etat, entered Okeda's home and murdered the man they found there. Emperor Hirohito thereupon publicly lamented the Admiral's death. The next day the true story was unearthed—that Okeda had escaped assassination and that his brother-in-law was the one slain. Despite his good fortune, Admiral Okeda has lost caste with Japan's citizens, who insist that he should have committed hari-kari—because he had disgraced the Emperor... disgraced him in returning to life, thereby becoming living testimony to the fact that the Emperor had uttered an untruth in lamenting Okeda's death.

Butterflies taste with their legs, which are 1,600 times as sensitive as the human tongue.

### Death Of Old Timer

#### Mrs. Wright Was First White Child Born On B.C. Mainland

The first white child born on the mainland of British Columbia is dead. Eighty years old, Mrs. Alice Rowbottom Wright, died after failing to recover from a heart attack suffered several months ago.

It was in 1858 that Mrs. Wright was born at Sapperton, at the time a tiny settlement five miles east of New Westminster, B.C. Her birth occurred just two months after her parents arrived from England. Her father, George William Rowbottom, and mother came to British Columbia with Col. Moody and his Sappers.

When she was 17 years old, she married John W. Wright and left for Lac La Hache where he kept an inn in the heart of the Cariboo gold country. In later years she was known to hundreds of prospectors for her kindness.

Since the year 1591, all the Popes of the Roman Catholic Church have been Italians.

### "TURN RIGHT TO OGDEN'S"

When you get rolling with this extra fragrant Fine Cut, you're on the straight road to sure smoking pleasure. There are no stops or detours to enjoyment either—when you roll your own with Ogdens, the cigarette tobacco that has everything a smoker could ask for. You'll make doubly sure of smoother, happier rolling if you always choose the best papers "Chanticleer" or "Vogue".

### African Bushmen

#### Stone Age Men Would Use Poison Arrows To Obtain Food

Unless they are allowed to use poisoned arrows to shoot game, Africa's Stone Age men, the bushmen of the Kalahari desert, will die out from sheer starvation.

This is the contention of members of the bushmen preservation committee, on which the British government, the South African government, the Southwest Africa administration and the University of South Africa are represented. The committee was formed as a result of the interest created when a group of the "little brown people" went to Cape Town last year to pay homage at the coronation.

The trouble is that there is an international convention for the preservation of Africa's fauna and flora, one clause of which forbids the use of poison for hunting.

"If they are to be stopped from using poisoned arrows, then they must be provided with firearms if they are not to die of starvation, and to give them firearms would be extremely inadvisable," Senator Boydell, a member of the committee, declares.

Senator Boydell contends that the bushmen could not possibly use enough poison to make any real difference to the fauna of Africa, and hopes that the committee may be able to secure a special reserve for them, where they can live as they have done for 16,000 years.

### SELECTED RECIPES

#### SPICED RELISH AND COLD MEAT PLATE

6 cloves  
2 1/4 cups water  
1 package Lemon Jell-O  
1/2 teaspoon salt  
1 1/2 cups India relish  
1 teaspoon drained horseradish  
Boil cloves in water three minutes. Remove cloves. Dissolve Jell-O in one pint of this hot liquid. Add salt. Chill. When slightly thickened, fold in relish and horseradish. Turn into half-size individual molds. Chill until firm. Unmold and cut in cubes. Serves 12.

Prepare luncheon plate of sliced liverwurst or cold meat loaf, rye bread sandwiches or potato chips, and a Jell-O mold, unmolded on crisp lettuce. Garnish plate with green pepper rings and stuffed olives.

#### CUCUMBER RELISH

1 package Lime Jell-O  
1 1/4 cups hot water  
1/4 cup vinegar  
1/2 teaspoon salt  
Dash of pepper  
1/2 teaspoon scraped onion  
2 cups drained, chopped cucumber  
Dissolve Jell-O in hot water. Add vinegar and 1/4 teaspoon salt. Chill. Add 1/4 teaspoon salt, pepper, and onion to cucumber. When Jell-O is slightly thickened, fold in cucumber mixture. Turn into half-size individual molds. Chill until firm. Unmold. Makes 12 half-sized molds.

Moliere was asked why in some country the king may assume the crown when 14 years old, but cannot marry until he is 18.

"Because it is more difficult to rule a wife than a kingdom," was the reply.

### British Train Coming

#### Coronation Scot Express Will Visit United States In January

The London Midland and Scottish Railway's Coronation Scot express train which will visit the United States will be shipped from England next January, it is announced.

The train, consisting of streamlined locomotive and eight coaches, will enter the United States via Baltimore. On arrival the engine and train will be assembled in the Baltimore shops of the Baltimore and Ohio Railroad.

Before going on exhibition at the New York World's Fair at the end of April, the Coronation Scot will make a tour of American railroads embracing 38 cities and towns and covering in all 3,121 miles. During the tour, the train will travel under its own power throughout and will be manned by an L.M.S. crew.

The Coronation Scot celebrated its "first birthday" in July, having been introduced a year ago as the first streamlined train between London and Glasgow, covering 401 1/2 miles in 6 1/2 hours.

Streamlined "Coronation" type locomotives which maintain the service hold the British speed record of 114 m.p.h.

The forthcoming American tour of the train follows the successful visit of the L.M.S. Royal Scot to America in 1933, when it was inspected by over 3,000,000 people.

### Keeping Tab

#### Germany Introduces A Family Book To Keep Records Of Families

Under a new law, which has just come into force, Germany has abolished the marriage register.

Instead, a "family book" for each family in the reich is to be kept, which will show births, marriages and deaths and be a complete record for all the members of the family.

It is hoped thus to "stimulate interest in the family, show members that they are connecting links in a long chain of generations and to awaken a feeling of responsibility for the maintenance of the family and of the German nation."

When couples marry in future, new leaves to cover their racial classification, relatives, domicile, etc., will be inserted in the "family book". Offspring of the marriage will be entered in the same pages until such time as they grow up and marry, when a new series of pages will be started for them.

The new law also applies to Germans abroad and it is hoped that within 30 years, as children grow up and marry, exact details of every German family will be entered up.

### Attacked By Wild Bees

#### Six Camel-Riders In India Were Stung To Death

Six Delhi, India, camel-riders of a passing caravan were stung to death by a swarm of bees in Suratnagar. According to the story of the only survivor, the caravan which had halted near the jungle, was attacked by bees shortly after the men had lighted a fire to cook their food, just below the hives. The victims, who ran in all directions, were pursued by the bees, which stung them to death in half an hour. The survivor ran off, leaving the camels to take care of themselves.

### RAILWAY OFFICIAL RECEIVES PROMOTION

NORMAN B. WALTON

formerly chief of transportation, Canadian National Railways, who has been promoted to Vice-President in charge of Operation, Maintenance and Construction, with headquarters in Montreal. Mr. Walton is one of the best known railway executives in the West and was formerly General Superintendent, Manitoba District and later General Superintendent of Transportation, Western Lines. He was born in Palmerston, Ont., and commenced his railway career in 1900 as clerk in Toronto with the Grand Trunk Railway.

### Poultry Market

#### Surplus Of Chicken Crop To Be Shipped To Britain

The 1938 indications are that the surplus of the Canadian chicken crop will go to Great Britain, the Department of Agriculture said. "Dressed chickens between three and five pounds weight sell most readily in Great Britain and to maintain a satisfactory export movement from Canada to that country a reasonable quantity of chickens of that weight is necessary," it said.

"Unfortunately, it is not the normal practice of Canadian producers to market chickens of that weight, but this year there are special reasons for doing so. The stocks of chickens in Canada are low, the prices for live chickens in the United States are not so attractive as a year ago and the signs in Great Britain are that there is an outlet for all the dressed poultry Canadian producers can offer."

### Knows Where To Go

#### Dog Visits A Veterinarian To Have Ears Treated

Paddy, Chesapeake Bay dog, owned by Mr. and Mrs. M. D. McLean of Calgary, knows when to visit the veterinarian. Taken by his owners to a veterinarian some time ago to have painful ear cankers dressed, "he now goes alone every time his ears hurt," said Mrs. McLean. "The treatment is painful but Paddy seems to know he must endure it patiently if his ears are to stop hurting him."

Another thing that slows up building is the realization that anything you build now will look queer by 1950.

Most fish that swim deep in ocean depths are red, but the pale light at that depth makes them appear gray.

## Fields For Exploration Work Narrowing Down As Earth Reveals Secrets

Tucked away in the issue of last week's newspaper devoted largely to the exploit of Mr. Hughes was a small item about bananas to be raised in Iceland. Mr. Hughes himself reported a Siberian mountain range a half mile or so higher than the best maps showed it to be. Which items illustrate the conviction of no small number of geographers that it is to those and other lands around the fringes of the Arctic that explorers and entrepreneurs of the present century must turn their eyes.

Last century it was Africa that furnished most of the exploring grounds. Perhaps there are a few bits of it still unknown but there cannot be many. Like the exploration of our own West a half century before, Africa's secrets have been learned. Its exploitation is well begun. The poles themselves seem to have no secrets much worth discovering. Travellers or would-be exploiters looking for something new must turn to Arctic Asia, Arctic North America or the islands between.

For both astronomers and geologists one of the most interesting spots on earth is that remote Siberian locality where Professor Kulik, of Moscow, found the landing place of the largest meteorite or perhaps small comet that has struck the earth within historic times.

Not far away, as the vast Siberian distances go, weather experts find cause for curiosity about the "pole of cold," the coldest region on earth. Why is this shifted so far from the geographical pole, naturally expected to be coldest?

Archaeologists have still to discover in Siberia the secret origins and unknown end of the civilized race of Samoyedes, who seem to have lived there some 2,200 years ago and since whom, until very recently Siberian cultures have continually decayed.

If Arctic North America, either in Alaska, Canada or Greenland, seems to offer no new mountains to be discovered like those encountered by Mr. Hughes, there are, at least, the scientific puzzles of the magnetic pole, the origins of North American weather, the effect of Greenland's ice cap on the climate of New York and the history and origin of the Eskimos.

Iceland's predicted bananas will be raised, it appears, by aid of the hot spring with which that volcanic island abounds, but Russia's plan for utilizing Siberia is a different one. More effort than has been expended anywhere else on plant breeding and other ways of creating new plants now is being devoted by Soviet scientists to new species or varieties of crops which can survive the Siberian winter or can be planted, grown and harvested during the hot, brief summer.—New York Herald Tribune.

### Their Method Is Simple

#### Toronto Chinese Know How To Get Money For War Fund

A method far simpler than any slick sales appeal is being adopted among Toronto's Chinese community to persuade delinquents to contribute their full share to the Chinese National War Fund.

In this again the Chinese reverse the practice of their white neighbors. They post no notice that they have done their share. But when a man fails to contribute a fair share of his income, his forgetfulness is proclaimed throughout the community. He is induced to wear a sandwich board announcing to all he is a traitor to the cause.

The Patriotic League recently inaugurated a Court of Patriots where it deals with such matters.

### Have Plenty Of Practice

Postmen make the best pedestrians, according to Ontario Highways Minister T. B. McQuesten. He said postmen used the streets more than anybody else but were rarely involved in an accident. He gave crossing between intersections as the main cause of accidents to pedestrians.

"Are those eggs fresh?"  
"Yes, fresh from the country."  
"But what country?"

### Thrift Reducing Mortgage

#### Young Minister Living Simply To Aid Finances Of Church

Rev. A. J. Jackson, rector of St. Hilda's Anglican church in Fairbank, a suburb of Toronto, arose from a camp cot in the gallery of the church and went down to the basement to cook his breakfast.

That was not at all unusual for the young bachelor minister. He's been doing it for four years, since he was inducted into his first charge, and likes it. He intends to maintain his "bachelor apartment" until the church can afford to give him a rectory.

Mr. Jackson found St. Hilda's was deeply in debt when he took the charge. The first night he was "on the job" he was served with a writ for the unpaid salary of the organist. So he told the parishioners he would not accept a salary until the church had liquidated its obligations.

There was no rectory. The young rector promptly put a camp cot in an upper room in the front of the church—separated from the main auditorium by a bannister and a railing—and set up a cook stove in the basement. His bathroom is the general wash room of the church.

By doing without a rectory, St. Hilda's has reduced the mortgage from \$25,000 to \$16,000 and has built a \$1,000 addition to the church.

### Speaks From Experience

#### Successful Newspaper Woman Says She Loves Sod Houses

Mrs. Violet McNaughton, O.B.E., vice-president of the Women's Press Club for Saskatchewan, came out from Kent, her birthplace, in 1909, to live on the prairie. For 16 years she lived in a sod house.

The roof leaked in 13 places; I know because that's how many pots and pans it took to catch the drops. I was sick once and had to lie in bed under an umbrella. . . I love sod houses. When properly constructed they keep out the cold in winter and the heat in summer.

Mrs. McNaughton began her newspaper work on the Saturday Press of Saskatoon in 1916, doing the woman's page. She became interested in the Grain Growers' movement, travelling up and down the country speaking and working for medical aid for the outlying farms. That led to the municipal hospital system of the province. Her articles were printed in English papers, too. It was for this work that she received the Order of the British Empire.

The Grain Growers became the United Farmers of Saskatchewan. Mrs. McNaughton became first president of the United Farm Workers' organization. Now she is editor of the women's section of the Western Producer, a weekly.

### Concert From Canada

#### May Be Broadcast To World Late In October

Gladstone Murray, general manager of the Canadian Broadcasting Corporation announced that the International Broadcasters' Union, with headquarters at Geneva, has invited C.B.C. to provide a world concert on Oct. 23.

Already, it is stated, forty different countries have announced that they will receive and distribute this concert to be originated in Canada. It is expected that practically all of the 54 countries which are members of the international union will take part in this broadcast.

This is the first recognition of its kind that has been given to Canada for the high standard of programs provided throughout the country by its national organization the general manager pointed out.

The excellence of the entertainment supplied to Canadian listeners throughout the past year and its steady improvement have won acclaim in other countries, he said.

Eire, the new name of Ireland, was applied to the Emerald Isle 2,000 years ago. It is pronounced "Air-a" with the accent on the "air". 2266

### Living In Peace

#### The Common People Of The Earth Have No Enmity Towards Each Other

That young man Hughes who flew over the top of the world in four days is more than an intrepid aviator. When he responded to the welcome they gave him in New York he departed from a speech somebody had prepared for him to speak of the fraternal feeling among radio operators of different nations and races (all had co-operated in his flight), added:

"If this feeling could be strengthened to a point where those men felt that their brother man was a little more than a pawn of a different sort on a chessboard, if they began to realize the other man was flesh and blood the same as them, then I don't believe that a lot of this killing would continue."

Which is true. The common people of this earth do not hate one another. The ordinary Englishman has no hate in his heart for the ordinary German, nor the ordinary Frenchman for the ordinary Russian. No Canadian, certainly, has any wish to shoot down a Frenchman or a German, or a Pole. Yet despite this, notwithstanding that the common people have no desire for war, and must hate war, some fatalistic something somewhere drives the world towards war.

If peoples could only find out what that something is, could define it, mark it and destroy it, achieve what somebody has called "moral disarmament", civilization would take its longest stride in all of human progress.—Ottawa Journal.

### Scientists Interested

#### Working On Theory Pleistocene Man May Have Lived In Minnesota

New evidence which may prove Pleistocene man lived in Minnesota during the great ice age attracted attention in scientific circles.

It was an oddly-shaped bone, lying among scattered skeleton remains of two giant beavers unearthed by Works Progress Administration workers widening a road along a cliff beside the Mississippi river.

Should the sharp-edged bone prove to be a weapon or knife, it would lend support to theories of Minnesota anthropologists that a skeleton uncovered near Pelican Rapids in 1931 was that of a primitive woman who lived at the edge of the great glaciers some 20,000 years ago, when the last great ice sheet was retreating northward.

So far, the "Minnesota man" has been the only find supporting the theory man lived in this area during the ice ages. His presence in Africa, Asia and Europe has been established.

The Arctic tern is the world's champion migrant. It nests as far north as 72 degrees from the North Pole. Around Aug. 25, when the young are fully grown, they are found in the Antarctic, 11,000 miles away.

"Come out of that water. Bathing's not allowed here."  
"Pardon me, I'm not bathing. I'm drowning."

## Sees Rapid Development Of Commercial Aeroplanes For Trans-Atlantic Flights

### Steel Support For Tower

#### Tilted Spire Of Salisbury Cathedral To Be Made Safe

The leaning spire of Salisbury Cathedral, 404 feet high and the tallest in England, is to be strengthened with a steel band. Since a gale cracked it in 1930, there has been the danger that the spire, which is 22 inches out of perpendicular, might fall.

The 600-ton weight of the spire is to be redistributed directly on to the pillars beneath the corners of the tower; the spiral staircases in the four corners of the tower are to be blocked up and a steel band placed around the base of the spire. The work will require 18 months. The effect will be to draw the weight proportionally down the centre of the tower to the main piers below and to remove the dangerous outward thrust.

When the cathedral was consecrated in 1258, there was no spire. There was a small lantern tower in the centre of the church which rose above the ridge of the nave roof and the four piers on which it stood provided ample support. In 1330, the tower was carried up and the spire was completed in 1335. This additional burden crushed the four piers and the spire tilted.

### Drama Staged By Mormons

#### Missionaries Put On Elaborate Pageant At Birthplace Of Faith

Before a crowd of 5,000, missionaries of the Mormon church dramatized their belief of the mission of Christ among the people of America on three huge stages in a natural amphitheatre at Palmyra, N.Y., the birthplace of their faith.

More than 150 missionaries took part in the drama. The actors were elaborately costumed and the stages were lighted with theatrical effects.

A loudspeaker system carried the voices to the spectators. Music for the pageant was furnished by a chorus of 100 women.

Before the curtain rose, four trumpets played Mormon hymns at the base of a monument atop Hill Comorah, where legend relates that Joseph Smith, founder of the faith, was told by the angel Moroni the location of the golden tablets in which the Book of Mormon was inscribed.

Many of those attending the pageant came from Utah and other western states. Several hundred of the visitors were from Canada.

A small man sitting in the corner of a tram glared at a very stout woman who occupied most of the seat. "It's a pity they don't charge passengers according to their size," he remarked.

"If they did," retorted the stout lady, "they wouldn't stop to pick you up."

## Crochet Works Magic With String

Household Arts by Alice Brooks

Crocheted Squares Easy Enough For a Beginner

### PATTERN 6187

You'll say it's magic as these squares come tumbling from your crochet hook! Before you know it you'll have enough to make a scarf or pillow. The more ambitious needlewoman will want to crochet this heirloom spread—it's inexpensive in string! Pattern 6187 contains instructions for making the square; an illustration of it and of stitches; photograph of the square; materials needed.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Mr. William B. Stout, Detroit engineer who addressed the Windsor Rotary Club, envisions the rapid development of commercial aeroplanes capable of carrying 100 passengers. This is the type of machine, Mr. Stout explains, that will be able to stay aloft financially as well as mechanically.

Mr. Stout gives credit to Mr. Henry Ford for the 100-passenger idea. "Mr. Ford's intuition," Mr. Stout explains, "is much more to be depended upon than anyone else's judgment." Plans have been prepared for these giant machines. Cost is estimated at \$3,000,000 each. Within three years Mr. Stout believes the big ships will have taken shape. A plane to carry 100 passengers can be operated at a greater profit than a trans-oceanic steamship, Mr. Stout suggests. A modern ocean liner makes a round trip in about 10 days; a 100-passenger plane is capable of five trips in the same time.

Taking a plane weighing 225,000 pounds into the air looks like an almost impossible task to the average layman. But much harder things than this have been accomplished by man's inventive, constructive genius. The time has passed when anyone can afford to scoff at such ideas, to say they are impracticable. Almost anything can happen in the field of engineering. Certainly there can be no reason for surprise if within the next three or four years we see a regular daily plane service between Europe and America. Arrangements are going forward for this very thing, and only recently Mr. Howard Hughes, the American millionaire sportsman, motion picture producer and aviation enthusiast, once more demonstrated how relatively easy it is to fly the Atlantic when he brought down his big machine in France in just half the time used by Colonel Lindbergh in the latter's history-making flight.—Windsor, Ont., Star.

### Entertained Royalty

#### When Harry Richman Sang Before The King And Queen

In London last month Harry Richman was invited to entertain before the King and Queen of England at the home of Lord and Lady Stanley. "How much will you charge?" Lord Stanley asked. "Charge?" Richman replied. "I'll pay for the job. Moreover, I'll pay the King and Queen for listening."

At the reception Richman was told that King George wanted him to sing "Birth of the Blues". Harry couldn't believe it, and asked the assemblage what songs they'd like to hear. "Birth of the Blues", shouted the King. "How'd you know that song?" Richman asked him. "You see," the King explained, "I have all your records."

King George then discussed American songs with Richman—while the titled guests stood at attention, because the King was standing. . . . And as they were departing Richman's bride, the former Hazel Forbes, curtsied before Queen Elizabeth. . . . "Thank you," said Elizabeth to Mrs. Richman. "Thank ME?" replied the American lady. "Yes, thank you," said the Queen of England, "for persuading your husband to come."—Leonard Lyons in New York Post.

### Taking Beauty Treatment

The Statue of Liberty is getting prettied up—at a cost of \$1,700,000. Workmen were removing the seven huge spikes from her crown, part of a general reconditioning of the 71-year-old lady who has been standing at the entrance of New York harbor since Oct. 28, 1886. The statue, a gift from the people of France, cost \$700,000.

Glasgow, site of the Empire Exhibition, is the second largest city in Great Britain, with a population of more than 1,100,000. Sydney, N.S.W., in the midst of a building boom, however, claims the position of second city in the Empire.

"How can you call it a love match! He must be worth quite \$50,000 a year."

"Well, isn't \$50,000 a year lovely?"

## The World of Wheat

By H. G. L. STRANGE

Thatcher, Renown and Apex, the new rust-resistant wheats, have been "tried in the fires and have not been found wanting."

This year most unfortunately a rust epidemic visited our prairies and many farmers who had to depend upon varieties susceptible to stem rust, such as Marquis, Ceres Reward, Garnet and Red Bobs, have suffered serious loss with their crops both in yield and grade.

The new rust-resistant varieties, however, have done well, for they have suffered little or no damage from the dread scourge.

Those farmers who were able this spring to obtain sufficient seed to sow their entire fields to any one of these new varieties are fortunate; those who were not, however, will have the opportunity this coming year of obtaining their full requirements of the seed of any one of these rust-resistant varieties, for good seed will be plentiful and at moderate cost.

Resistant to stem rust as these new varieties are, however, they can only be regarded as "stop gaps," to be replaced as soon as our Canadian Plant Breeders are able to release for use some of the better new rust-resistant strains which the Dominion Rust Research Laboratory now has in the making.

Following factors have tended to raise price: North China continues to buy Australian flour -- Continent and United Kingdom purchasing U.S. Pacific wheat -- Drought and heat lowering corn yields in Southern Europe and Danube Basin -- Germany buys U.S. corn -- Severe drought causes wheat crop failure in Spain

Following factors have tended to lower price: Poland announces export bounty on wheat -- Increased wheat production in Japan -- France imposes import duty on oats, rye and barley -- Bumper grain crop indicated in Germany -- Private Hungarian wheat estimates larger than official -- Most importers confining purchases to immediate needs -- Widespread rains in northwest India benefit good grains.

## Alberta Crop Report.

Alberta's crop benefited from the cooler weather prevailing during last week, especially central and northern sections where showers also contributed to a more normal development than was the case in the latter part of July when drought and heat forced the crop along too fast. In southern Alberta the weather was warm and no moisture has been received. At the weekend rains were general and heavy falls were recorded particularly in central areas. While late crops were benefited harvesting operations will be delayed. Hail accompanied the rain in some districts, adding to Alberta's already imposing hail loss. Scattered districts in an area extending from McLeod to Taber reported losses ranging from 10 to 100 per cent. A few smaller areas also reported damage.

Harvesting has commenced all over the province and was expected

to be general this week in the south and east districts. Barring further delays it should be in full swing by August 15th, and possibly slightly later in the extreme south-west and the irrigated districts. Rye harvesting is well advanced and many early fields of wheat and barley have been cut. With the exception of the Peace River district, wheat averages from two and one half to three feet in height almost a third higher than in the two preceding years at this time. In general, the wheat heads are medium size and filling varies from fair to good.

Conditions are unusually spotty and variations are in evidence even in adjoining districts. The south-western part of the province has the best prospects, and condition has been well maintained. A large area between Calgary and Edmonton has also good prospects except where hail has done severe damage, tending to be poorer in the latter vicinity. The eastern districts suffered from drought, and yields will be light, although the central areas have some districts where crops will be fairly good. In northern Alberta, crops show variation but heads have filled surprisingly well and a fair yield is anticipated. Delines in wheat condition have been moderate but coarse grains have not fared so well. In the Peace River area, the best that can be expected is a somewhat less than half a normal crop. The straw is short and heads are small.

Frank Collicutt, prominent livestock breeder and farmer of the Crossfield district, this week was elected permanent member on the Unity Council, as representative of the Cochrane Constituency Unity Association. Mr. Collicutt is one of the pioneers of the movement in Alberta.

# How Do "Little Savings" Finance Mortgage Loans?

**Answer.**—Every mortgage loan made by a Life Insurance company is made up of the savings of several policyholders.

**Question.**—What do these savings represent?

**Answer.**—They represent the money which thrifty men and women have invested in Life Insurance for the protection of themselves and their dependants.

**Q.**—What is the average policyholder's share in Life Insurance assets?

**A.**—Approximately \$571.

**Q.**—Then it would require most of the accumulated savings of six policyholders to make a mortgage loan of \$3,000?

**A.**—That is a fact.

**Q.**—How much Life Insurance money is invested in mortgages?

**A.**—More than \$387,000,000 of policyholders' "trust funds" is invested in first mortgages on farm, town, and city properties in Canada.

**Q.**—Why do you call them "trust funds"?

**A.**—Because they do not belong to the companies but are held in trust for more than 3,500,000 Canadian policyholders, most of whom are in modest financial circumstances.

This is the seventh of a series of messages sponsored by Life Insurance Companies operating in Canada. The eighth, to appear in two weeks' time, will deal with Life Insurance as Canada's greatest co-operative business.

**Vote Against Larger School Unit**

The following letter has been forwarded to the department of education and contains the results of the vote taken in the Olds division, on the larger school unit. This vote, which was taken at the request of the department is definitely opposed to the scheme.

Minister of Education,

Referring to our letter to your department of October 16, 1938, requesting deferment of action in the establishment of the proposed Olds School Division until an expression of opinion could be obtained from the various school districts involved and the Deputy Minister's reply, stating your department would be prepared to consider any representation made by our committee.

We herewith submit the results of a vote taken in the following districts.

	No. of votes	
	For	Against
Abernethy	0	35
Betchton	5	43
Bergen	0	28
Bearberry	2	63
Berrydale	16	54
Beaver Dam	1	41
Burnside	8	39
Clovermount	0	48
Edwold	0	23
Dog Pound	3	41
Dartigue	0	20
Elba	3	29
Elkton	1	5
Eagle Point	61	0

New Bergthal	6	14
Rugby	3	38
Sundre	7	25
Springside	0	45
Samis	2	50
Sunshine	0	18
Tany Bayn	0	26
Waterloo	0	20
Water Valley	2	13
West Hope	4	30
Westward Ho	0	39
Poplar Creek	0	39
Lone Pine	1	48
Hammer	1	24
Eagle Hill	7	19
Bennett	4	47
Colborn	2	39
McDougal Flats	0	28
Total	175	1359

We feel that this vote proves beyond question that a large majority of rural parents and rate-payers are opposed to the establishment of a School Division in this area.

We urge that the wishes of people as expressed in the vote be respected.

R. Phillips, Sec. W. H. A. Thomas, Chairman

**Items of Interest**

Alberta Government buildings are exempt from municipal taxation according to a ruling issued here today by A. A. Carpenter, chairman of the provincial assessment commission. The commission's decision allowed an appeal by the Alberta Liquor Control Board against a business tax imposed upon its store at Vermilion by the municipal council there. The Vermilion revision court had dismissed the board's appeal against assessment. Many municipal councils in Alberta have gone on record in the last few years as favoring taxing of provincial government buildings, especially liquor board stores.

The hockey situation in Olds does not look too good at the present time and hockey supporters and fans alike are anxious to know what is going to happen to the Olds Elks this winter. This of course, in view of the fact that Olds has been visited by several disastrous hail storms. It is a well known fact that Olds has a good team lined up, providing they can finance it. It will cost more than last year, and it would be unreasonable to expect that gate receipts or donations from the town or district would be as great as last year. — Olds Gazette.

**"EP" Cattle to be Sold.**

Recognized by breeders as some of the finest beef type animals in the country, all the Shorthorn cattle on the Duke of Windsor's EP ranch at High River will be disposed of by auction next month, W. L. Carlyle, manager of the ranch said Monday.

Mr. Carlyle explained that catalogues listing approximately 135 head of both imported and home bred cattle are now being printed and will be forwarded to interested parties. The date of sale has been fixed at September 30.

"I have received instructions that we are definitely going out of cattle raising, but will continue with horses, sheep and ponies," Mr. Carlyle stated.

**The Utility Of A Wheat Board**

It is gratifying to note the degree of solidarity with which the majority of the people of Western Canada have gotten behind the Wheat Board this year and made representations to the government in support of a reasonable initial payment. It is many years since the west showed such a united front.

The fact that there is a Wheat Board today is due to the determined insistence of the Wheat Pools of Western Canada. These organizations sent delegation after delegation to Ottawa during the past eight years to press the need of a Wheat Board before the Federal Government. They also presented the case for a Wheat Board before various governmental inquiries and commissions. In all these activities they had the support of the United Farmers of Alberta, United Farmers of Canada, Saskatchewan section and the United Farmers of Manitoba. A few other organizations such as the Association

of Rural Municipalities gave appreciated support.

There is a fair crop in Western Canada this year. A large number of farmers who haven't had anything like a crop for six or seven years, will have some wheat this fall. The fairly high prices of the past two

years meant nothing to them for they got no benefit from them. This year when they have something to sell prices have hit the skids. This is a condition that people should not overlook. Western wheat producers need a Wheat Board.

**HAS A  
HUGE APPETITE FOR  
WESTERN PRODUCE**

THIS man is a composite of many thousands of Eastern industrial workers. He's a husky fellow and he burns up plenty of energy when he's busy.

It takes lots of Western food to keep him going. But when he's idle he goes off his feed so badly that even Western produce cannot tempt him.

Which is just another way of saying that an active industrial East — typified by the Automotive Industry and the industries that supply its parts and raw materials — is vital to the well-being and prosperity of the agricultural West.

More than 6,000,000 lbs. of poultry; over 50,000,000 eggs; over 20,000,000 lbs. of butter and meats, live and dressed, to the value of over \$15,000,000, were bought from the West last year by Eastern industrial payrolls. Your purchase of a Canadian-built car helps keep these payrolls active — and brings your good money back West again.

**AUTOMOTIVE INDUSTRIES  
OF CANADA**

For statistical and further information about this industry, write to Automotive Industries, 1006 Lumsden Building, Toronto.

## WORLD HAPPENINGS BRIEFLY TOLD

George S. Black, district agriculturist at Grand Prairie, has been appointed livestock promoter for the Alberta department of agriculture.

A sudden outbreak of infantile paralysis spread consternation throughout the quiet country community of Halstead, Essex, England.

The first Turkish submarine to be built in Germany since the Great War was launched at the Krupp shipyards in Kiel, in the presence of Turkish officials.

Mexican regional schools, whose socialistic educational program has invited attacks by armed rural bands, have received government authority to install arms.

Arthur Bartholomew English, the almost legendary "Arthur Ellis" who was Canada's hangman, was buried in a lonely little plot in a cemetery on the slope of the mountain around which Montreal is built.

A manifesto calling upon engineers, shipbuilders and ship operators to further the use of native coal rather than imported oil in British ships was made public by the British Coal Campaign.

Forty thousand Belgium war veterans cheered their royal family at the unveiling of a memorial to the late King Albert on the banks of the River Yser. The \$100,000 cost of the memorial was borne entirely by Belgium's war veterans.

A cat that was at the Battle of Vimy Ridge in France, has died at Covehithe, Suffolk, England, aged 23 years. It belonged to W. Folkard, a game-keeper, whose son, then in France, found it on the battlefield and brought it home.

M. I. "Mickey" Ryan, northern transportation official, reported that freight movement to date this year over the portage between Fort Fitzgerald, Alta., and Fort Smith, N.W.T., western gateway to the North West Territories, has been the heaviest in history.

### Opinion On Art

Walter Disney In The New York Times Magazine

"I have no favorite painters. I don't know anything about painting. Oh, yes, I go to exhibitions and I envy the men who can paint a figure or a landscape. But for me there must be something more in a picture than the literal rendering of an object. If that were all that is necessary a camera would be a better artist than Rembrandt.

"A man must have something to say, he must see things in a new and individual way. He must be stirred by the play of light on flesh or by the glow of the sun on trees and he must be able to put some of the emotion he feels onto his canvas. If he succeeds in doing this, then he is an artist. But, unless he can draw, unless he knows the grammar of his art, I do not believe he is equipped to express his emotion."

### Pygmies Make Jumping Record

Four Inches Above Olympic Mark States Missionary From Belgian Congo

Economic depression is unknown to Central Africa pygmies, stated Rev. Howard Bigelow, on his return to Calgary after nine years in the Belgian Congo as a missionary.

The pygmies average only four feet in height. They gorge for several days on antelope and elephant meat, then subsist for a period on roots and herbs.

Members of one tribe among whom he worked were excellent high jumpers—one village record was four inches above the Olympic games mark, he said.

Natives work on roads, carrying rock nine hours daily for 50 cents a month. Disease among the natives is a serious problem, he said.

### At Royal Luncheon

George Tufts, of Niagara Falls, Ont., made an unexpected speech at a civic luncheon in Edinburgh in honor of the Duchess of Kent, to which more than 120 touring Canadian schoolboys had a surprise invitation. Tufts, replying to the toast to the Canadian boys, said: "I am at a loss for words, but we will always look back to this occasion as one of the greatest events of our lives."

### New Type Of Grass

Grown By Alberta Farmers. It Is Said To Be Ideal For Golf Courses

A Czechoslovakian grass known by name as "Red Fescue" is providing a new export commodity for 10 farmers in the Olds district, north of Calgary.

It is described as ideal for golf course fairways and the farmers are finding a ready market for its seed in the United States.

A "running grass," it has tremendous turf holding power and spreading capacity. It is also a tenacious climber, readily clinging to the side of embankments.

Originally it was brought into Canada from Czechoslovakia by the Dominion department of agriculture in the hopes it might bolster forage crops. It was not altogether successful for this purpose but it was found the "running habits" made it a most suitable golf course grass. "Red Fescue" is classed as "medium" in texture.

Some of the farmers have made sales of the seed direct to United States golf clubs while others have sold indirectly through dealers.

### Empire Unity

Chamberlain Says Empire Should Not Fall Out In Foreign Affairs

An appeal for empire unity on foreign affairs was voiced by Prime Minister Chamberlain at the annual meeting at London of the Empire Parliamentary Association.

Attended by leaders of the opposition parties, the meeting was presided over by Capt. Edward Algernon Fitzroy, speaker of the House of Commons.

"In these days, not entirely by our will or consent," Chamberlain said, "foreign affairs take up the greatest part of our time and attention."

"Well, whatever may be our views about foreign affairs, one thing we shall all agree about, and that is that it is most desirable that the empire should not fall out about foreign affairs."

"As far as possible we should present a united front to the rest of the world, for in that way we are likely to exercise a far greater influence than if it were thought that there was not harmony among us."

### Oldest Steamer

Built On The Clyde 84 Years Ago, And Still In Service

Melbourne, Australia, is the port of registry for the oldest steamer in the British Empire—the Edina, 171 feet long and 26 feet six inches wide, staunchly built of Lowmoor iron by Barclay, Curle, & Co. on the Clyde 84 years ago. She has survived three strandings and as many collisions, in each of which she sank the other vessel. She is now an excursion steamer on Port Philip Bay.

Originally equipped with sails and steam, she ran between Leith and Hull and later carried stores and horses to the Crimea. Florence Nightingale was possibly among her passengers. She was in turn a Mediterranean "fruiter" and a North Sea trader.

During the American Civil War she several times ran the blockade, returning with cotton for Lancashire looms.—Manchester Guardian.

### Fate Of Motherland

Island Sinking Into The Sea At Rate Of One Inch In Five Years

In the last week, scientists have pronounced a fearful fate upon Britain. The famous isle is sinking into the sea at the rate of one inch in five years. In the last 400 years, the island has sunk eight feet.

The public has evinced small interest in the ultimate fate of the motherland, yet within the next hundred years it is expected that Britain's bridges will have to be raised. The wall of the embankment along the Thames will be so high that pedestrians will not be able to see the river.

Among the victims of the sea, already recorded, are the fortified city of old Winchelsea, which was a busy port in the 13th century but which now lies seven miles out in the channel and the two Dunwiches, in East Anglia, both of which are submerged off the Norfolk coast.

Guatemala set a new high monthly record for banana exports in May when 1,213,203 stems were shipped from that country. 2266

### A JUMPER FROCK THAT'S NEWS

By Anne Adams

"What's the most popular juvenile fashion?" The answer, of course, is Jumper Dresses—and THIS is the newest, sweetest edition of them all! Get an order in for Anne Adams Pattern 4859 immediately, and you can make up several versions in time for school days as well as current needs. There's a Sewing Instructor included that explains systematically what to do and when—so it's simple to stitch up this jaunty, panel-type jumper, and blouse! For now, choose cotton broadcloth—and for classroom wear, cut into warm flannel or serge. Daughter will beg for plenty of cotton blouses to be "changeabouts!"

Pattern 4859 is available in girls' and junior sizes 6, 8, 10, 12, 14 and 16. Size 12, jumper, takes 2½ yards 36 inch fabric; blouse, 1½ yards 36 inch fabric and ¼ yard ribbon.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

### Big Game Hunter

Montreal Business Man Returning To Canada After Visit To Africa

Harry Snyder, Montreal business man and big game hunter, is returning to Canada after shooting a world's record elephant and photographing the first Albino giraffe ever reported by a white man.

Mr. Snyder sailed for New York with a large number of museum specimens, almost 16,000 feet of motion picture film, hundreds of still pictures and a conviction he should have taken with him to Kenya the eiderdown sleeping robe that kept him warm in Arctic Canada.

Mr. Snyder was at Eldorado, North West Territories, last summer when he announced his intention of going to Africa. For years he had hunted and photographed big game west of the Athabasca and Mackenzie rivers and on the northern slopes of the Rockies.

### An Unusual Accident

Baseball Strikes Boy's Hand And Severs Index Finger

Young Thomas Brady lost a finger while watching a baseball game at Kirkland Lake, Ont. With some chums he had been sitting on top of an iron fence when he decided to jump down. A fly ball was coming towards him as he put his hand down on top of the fence to let himself down. The ball landed squarely on the hand, completely severing the index finger.

### Corrected Arithmetic

Father stopped Mabel's young man as he was leaving the house.

"You've been calling on my daughter for six months, young fellow. What are your intentions?"

"Well, sir," replied the suitor, "I hope to become an addition to your family." Father shook his head.

"Oh, no, young man. You'll have to subtract, not add."

### An Arctic Wedding

British Scientist Marries Halifax Girl On Patrol Ship Nascope

Thomas Henry Manning, distinguished British explorer and scientist, and Ella Wallace Jackson of Halifax, were married aboard the Arctic patrol ship Nascope.

Rt. Rev. Archibald Fleming, Anglican Bishop of the Arctic, performed the ceremony, and John Buchan, son of Canada's governor-general, acted as the best man.

The wedding ring was furnished by Chief Engineer Thomas of the Nascope, who fashioned it from an engine-room fitting.

The Nascope, Arctic supply ship of the Hudson's Bay Company, stopped at Cape Dorset on its way to Churchill, Man., from Montreal on its regular summer patrol of outposts near the Arctic circle.

Manning, leader of the British-Canadian Arctic expedition, said he was planning to carry out the original program of the expedition, involving two years of scientific investigation on Baffin island.

Cape Dorset is on the southwestern tip of Foxe peninsula, putting out from the southern part of Baffin island.

### Better Left Alone

Itinerant Salesmen Are Poor Substitute For Reputable Store

It seems to take some people a long time to learn that it pays to do their purchasing at a reputable store, a store which will be open for business tomorrow and next week and so on.

Toronto has been having experience with salesmen who go from door to door selling rugs, and these rugs were represented as being exceptional bargains because they were the property of people who were "leaving the city," "selling out" or "moving into a much smaller house."

One victim purchased a so-called "genuine inlaid broadloom." It was first offered for \$78, but not sold until the price had been beaten down to \$20 at which point the purchaser was certain the bargain was real. Examination by experts revealed that the rug was made of inferior jute and was of little value at any price.

The stores in your own community are not going to fool you because they want you back again, but the man who sells at the door is making just one call and he knows he will not be doing business with you again. —Peterborough Examiner.

### Payment For Wet Weather

Fund Created For Building Industry In Great Britain

The agreement for payment for "wet time" has been approved at a special meeting in London recently of the National Joint Council for the Building Industry of Great Britain. The agreement provides for the creation of a £2,000,000 fund into which craftsman will pay sixpence per week, and apprentices and other juniors twopenny half-penny per week. The employers will double each contribution. When, owing to unfavorable weather, the operatives are unable to work, they will receive 50 per cent. of their wages. The arrangement is to come into active operation a year after the payments into the fund begin.

### Radio Distress Signal

Designed To Rid Flying Of The "Missing Plane" Danger

An automatic radio distress signal to rid flying of its "missing plane" bugbear was reported to California Institute of Technology.

The instant a plane equipped with this "little black box" goes down in a forced landing, even though it be demolished, the distress signal will begin to work. For as long as four days it will send out uninterrupted short wave calls for help.

It is a rugged little battery-operated radio sending station, insulated from fire.

The real trouble and cause of most accidents is impatience. Care will do more to reduce the number of road accidents than any sum of money that we could afford to spend.

In England, after winter gales, searchers on the seashores look for crystals, corallian, amethyst quartz, and other semi-precious stones, to be used in making jewelry

### Idea Did Not Work

Scheme To Investigate Loch Ness Sea Monster Was Not Popular

Sad is the news from Glasgow, says the Cleveland Plain Dealer. It appears that the effort of a thrifty and scientifically-minded Scot to incorporate the Loch Ness sea monster is doomed to failure.

The sea serpent of Loch Ness, it will be recalled, has been what the country correspondent would call "almost unique" in his class. Usually a sea serpent is a come-and-go sort of fellow, good for only a single summer's flurry. But the chap up in the shadow of the Highlands has been on the job these three or four seasons. Like some other things Scottish, he is enduring.

It was, no doubt, the persistence of the monster which led one Capt. D. J. Munro, a seafaring man of years and discretion (one is told he went to sea in 1880 at the age of 11) and, being a Scot, a person of unquestioned probity, to evolve the incorporation plan.

He proposed a systematic three-month observation of Loch Ness by responsible persons, himself included, armed with cameras, range finders, echo sounders and other instruments. Doubtless the equipment would likewise include a bit of salt to be put on the monster's tail by some intrepid truth-seeker. The results of the observation were to be submitted to a committee of eminent scientists, which would decide once and for all whether the Loch Ness monster is or isn't.

Capt. Munro sought 1,500 pounds to finance the summer's search. A truth-loving public was invited to buy one-shilling shares in a limited liability company.

But it appears that the public does not love 1,500 pounds' worth of truth. Only 50 pounds have been forthcoming, far too little to do a thorough Scottish job of truth-seeking by the banks and braes of Loch Ness.

The captain is discouraged, and ready to give up his scheme to apply the scientific yardstick. But perhaps the innkeepers hard by Loch Ness would just as soon keep the mystery green. And, maybe, the whole incident proves once more that, to give metaphor a geographical journey, the Scots are from Missouri.

### Miscalculated The Date

Michigan Man Had Tombstone Marked But Did Not Die

Willard Hyatt, 84, Burlington, Mich., bargained with death in good faith, but miscalculated.

It started back in 1919 when Hyatt decided that Arlo Mumaw, monument manufacturer at nearby Marshall, should make him a tombstone. Inscription on the stone should read: "Willard Hyatt—1854-1934." Hyatt was to reach his 80th birthday then and he "knew" the Grim Reaper would call for him. He had reason enough to believe that—his father and mother and his four brothers and seven sisters all died during their 80th year.

The monument was erected and Hyatt began trimming up his burying ground. Death tiptoed past Hyatt's home during 1934 and so far has kept right on going.

Hyatt explains that "maybe they've switched dates on me. I'll still wait."

The northern hemisphere has a warmer average temperature than the southern hemisphere.

## CHAPTER I.—Continued

"Yah! If you can't go in by way of Wrangell, how do you go in?"

"By Fourcross, if you want to be a fool and try it."

"What's so tough about that?"

"The weather," Jack insisted. "You don't get any warm winds from the Japanese current, once you're over the Coastal range. It's 35 and 40 below, all the way to the Stikine."

"I know that," said Olson laconically.

"But why fight the bush for 200 miles with dog team when in a few months, there'll be airplanes, or easy travel along the river and mountain trails—"

"Yah," said Olson, "and find all the claims gone."

"Or you've gobbled up the whole country through a set of dummies," the red-faced man added.

"You can figure that out for yourself," Hammond answered abruptly, and shouldering through the crowd, again moved up the street, leaving the throng muttering behind him. But again, a block farther on, his progress was halted. This time it was a woman.

"Well, Prospector," she asked, "Can't you say hello?"

Hammond looked up into the features of a wrinkled person, valiantly battling her age with thick foundation cream, high rouge, mascaraed eyes and a heavily lip-sticked mouth. Yet it was a sprightly face, blue eyes set in crows'-feet of humor and experience; lips which life had hardened without leaving them grim.

"Well, Annie!" he exclaimed. "How are you?"

"About the same as the last time I saw you—when we made the rush together into Rouyn, in Quebec."

"That's right. Glad to see you again, Annie."

"Thanks. That goes double, Prospector."

Silence followed. For an instant Jack Hammond felt annoyed at this interruption. Then he dismissed her; it was only around the World Annie, who had made every Canadian gold rush of the last twenty years. Around the World Annie, with her lore of frontier knowledge, her inevitable thickness of paint and mascara and garish clothes, her log cabin at the edge of camp with its dance hall, illicit drinks, its screaming phonograph—

"Living here, are you, Annie?" Hammond asked at last. Around the World Annie straightened. An effluent woman, with what might be called an old-fashioned figure, she groomed a loose fold of dress, and raised a diamond-fingered hand to restrain a wisp of bleached hair, wilting with the dampness of the incessant rain. Then, with a jerk of her head, she indicated a group of dance hall girls who stood in a nearby doorway, as though they had been herded, all of them overdressed.

"Listen, Prospector," she asked, "would I be chaperoning that gang of girls if I was living here in Prince Rupert?"

"But where are you headed for?" She grinned, the wrinkles therefrom creating deep creases in her face enamel.

"I'm going where you're going, Sweetheart."

Hammond sighed. "I suppose you were on this morning's boat too."

"Got on at Vancouver."

**STOP Scratching**  
RELIEVE ITCHING in A Minute  
Even the most stubborn itching of eczema, blotches, pimples, athlete's foot, rashes and other skin eruptions, quickly yields to Dr. Dennis' soothing, antiseptic, liquid D. D. D. PRESCRIPTION. Its gentle oils soothe the irritated skin. Clear, greaseless and stainless—dries fast. Stops the most intense itching instantly. A 35¢ trial bottle, at drug stores, proves it—no money back. Ask for D. D. D. PRESCRIPTION. 28

Hammond pursed his lips. He was becoming more philosophical. "I guess I missed a lot on that boat."

"Oh, you'll catch up with it all." She leaned closer. "Just tell me this much. You're going on, on to-morrow morning's train, aren't you?"

For the first time that morning, Jack Hammond truly smiled.

"Yes, Annie," he said. "You might as well pass the word along. I guess the secret's out."

"You're right it's out!" agreed Annie. She patted him on the shoulder. "Well, I'll be seeing you." Then with a grandiloquent wave, she summoned her followers from the doorway.

Hammond walked on, to the sting of fine rain against his face. The smile had vanished; gloominess had taken its place. Everything had looked so different down there in Seattle, with Kay in his arms, and the secret that he had promised his partner to treasure flooding over liquor-loosened lips.

Kay—the thought of her electrified him. His brain suddenly shimmered with a thousand disconnected but glorious memories; blurs and figures from which only one emerged clearly. It was that of Kay Joyce, golden-haired Kay, with her blue eyes hypnotizing him, her soft body against his as they danced, or floating far away as all the world became vague and dreamlike. Kay tight in his arms until he could see only the curve of her forehead and the uplift of her eyelashes. Or leaning on her elbows beside him, her hands crossed under her chin, her tantalizing lips curved in a challenging smile. Then the soft touch of her thigh against his as the music started anew and they rose to the call of the dance floor.

He stumbled and brought himself up short, suddenly realizing that Seattle was far away. This was Prince Rupert, bleak in the grip of a winter rain, yet burning with the gold fever.

A girl was coming down the steps; she had a hand to her throat, clutching it as if seeking, by muscular power, to overcome a desire to sob. Her face was bloodless; for an instant she looked at him, with hazel eyes in which burned the fever of desperation. Then bravely she straightened, and while he flattened himself against the scarred, plaster wall of the staircase, went onward. In the glimpse of passing, Hammond could not help noticing the spasmodic jerk of her otherwise fine lips, the tenseness of her, the expression of gauntness with which she faced the drizzly square of outside light. A moment more and she was gone.

## CHAPTER II.

Once in his lawyer's office, Hammond's manner became something like that of a wayward boy, returned from truancy.

"Hello, Barstow," he said, as casually as possible, and eased into a chair. The attorney looked up. He was a man of middle age, with kindly eyes, which, this morning, seemed strangely troubled.

"Oh, it's you, Jack," came quietly. "Sit a minute, will you?"

"No hurry," Hammond picked up a copy of the Prince Rupert paper and tossed it aside. It was not the edition he sought. The attorney shuffled a mass of legal documents into a container envelope.

"Well?" he asked quietly—almost unhappily.

Hammond eyed him. Barstow was usually good for a joke.

"Stomach out of order?"

"No." He shrugged his shoulders. "Sore at me?"

Each pad will kill flies all day and every day for three weeks.  
3 pads in each packet.  
10 CENTS PER PACKET  
at Druggists, Grocers, General Stores.  
WHY PAY MORE?  
THE WILSON FLY PAD CO., Hamilton, Ont.

"Why?"

"For letting this thing out?" The attorney smiled.

"That's between you and McKenzie Joe."

"Oh, Joe's taking it all right. A little caustic, but—"

"Joe's natural state."

"Yes," Hammond laughed. There was an awkward silence. The attorney wiped his glasses, then sat crimping the edge of a sheet of legal paper.

"Not quite myself this morning," he apologized. Then, abruptly, "I'm not much good at telling people things that hurt."

"Bad news?"

"Nothing that concerns Joe or you. Some one who was in here just before you came. I had to be pretty frank—and the truth in this case is fairly rotten."

"That's always tough."

"Yes, to cut the foundations out from under somebody—destroy illusions, paint things exactly as they are. Especially with a woman."

"A young woman, wasn't she? Rather good-looking—poorly dressed?"

"Oh, you saw her?"

"We passed on the stairs. She looked pretty well cut up. Client of yours?"

"Well—" the attorney hesitated. "Not exactly—sort of a volunteer client—that is—"

With an effort, he assumed an attitude of brusque interest. "What are you in here about so early in the morning?"

"Joe left a note for me. Gone north—guess you know that. He's travelling light, without many supplies. Afraid somebody will jump our claims. Wants me to follow as soon as I can with a couple of dog teams and a complete outfit. That newspaper stuff—"

"Get it all out of your system down there in Seattle, did you, Jack?"

Hammond stirred uneasily.

"Well, that depends on how you look at it. Personally, I feel great about it. But someone else might just think I had been on an ordinary drunk."

"The newspapers gave you quite a play."

"I've been hearing about that ever since I landed. It's rotten in a way—if I started a lot of tenderfeet into that district."

"Oh," Barstow, elbows on his desk, steeped his fingers. "I don't think it's done so much damage. Just began the rush a little earlier—it would have come anyway. What happened in Seattle?"

"I met a girl I was in love with."

"One of those first-sight affairs?"

"No," Hammond put out his hand, holding it a few feet above the floor.

"I've been crazy about her since I was that high. Kay Joyce. Her father used to be president of the Sunatchee Bank and Trust. He died about a year ago. We used to live down the street from each other. Rather, at an angle—I lived by the alley."

"Childhood playmates?"

"No." A serious expression had come into the young prospector's eyes. "She'd never have anything to do with me."

"I don't quite understand."

"I met a girl I was in love with."

"One of those first-sight affairs?"

"No," Hammond put out his hand, holding it a few feet above the floor.

"I've been crazy about her since I was that high. Kay Joyce. Her father used to be president of the Sunatchee Bank and Trust. He died about a year ago. We used to live down the street from each other. Rather, at an angle—I lived by the alley."

"No." A serious expression had come into the young prospector's eyes. "She'd never have anything to do with me."

"I don't quite understand."

"Her father was the big banker. My father was a switchman, out of work most of the time. My mother took in washing."

(To Be Continued)

## Decorating Peace Arch

Carvers Working On Stone At Entrance To House Of Commons At Ottawa

The lion and the unicorn are being curry-combed on Parliament Hill adding an extra attraction for the daily thousands of sightseeing tourists. Two trained carvers armed with power drills are adding finishing touches to the curly manes of the stone carving of the animals that stand at the base of the sandstone Peace Arch at the entrance to the House of Commons.

Three more carvers are cutting stone squares on the two side arches to represent wild flowers of Canada. The trillium, water-lily, iris, purple-flowered raspberry, thorn apple, Jack-in-the-pulpit, lady slipper, dog's tooth violet, Indian cup and tiger lily are included in the emblems that will mark the 17 squares around each archway. Animal life has been included in several of the carvings. A sleepy frog sits beside a skunk cabbage in one square, in another, a salamander twines itself among marsh marigolds (cowslips) and a snail rests on water leaves in another.

Topping one arch will be combined heads of an Indian and a French-Canadian habitant, while an Indian and a western pioneer in similar pose will centre the peak of the second arch, depicting the bonds of friendship established between the early settlers of the land.

Three days' hard work is required to complete one square. With compass and a heavy black pencil the design is sketched on the bare, stone square from a plaster of Paris model completed by Cleophas Soucy and Couer de Lion MacCarthy in their clay modelling room in the basement beneath the Senate Chamber. Fitting a heavy chisel into the power drill, the carver cuts the outline, adding the delicate finishing and smoothing touches with finer chisels.

## The War Debt

Britain's Obligations To United States Open For Consideration

The Earl of Stanhope told the house of lords that the question of Great Britain's war debt to the United States "is left open for consideration at the moment both governments felt likely to arrive at a solution satisfactory to each."

Lord Stanhope, government leader in the house of lords, declared:—

"It may be well to contradict suggestions sometimes made that His Majesty's government fail to recognize the great importance of this question or that the debt has been repudiated."

He spoke after Viscount Samuel, Liberal, suggested the United States might be willing to pare the debt because of the British government's rearmament program "which is intended to safeguard the peace of the whole world."

## Letter Saved His Life

Written By Lord Baden Powell To Scout In Hospital

Eric Hall, who was formerly commissioner of Boy Scouts in America, tells of an incident a few years ago when one of his scouts lost a leg in an accident. "He was slowly dying in hospital through sheer lack of interest," he said. "Then Lord Baden-Powell, to whom I had written, sent a letter to him. Everything changed. He fought and lived." This letter is now framed in the Scout headquarters at Albany, New York. The sequel is four pages of youthful signatures which was sent by the scout troop to Lord Baden-Powell, wishing him a speedy recovery from his recent illness. His letter to the scout in New York, in the opinion of doctors and the hospital authorities, was undoubtedly the turning point in the boy's fight for life.

## The Tin Can Era

Housewives are busier these days—at least in the use of can openers. The board of public works in Los Angeles reports that tin can collections now total 150 truckloads a day, as against only half that amount in 1931.

Good to the first drop—the stock market.

## Planned Health Policy

New Proposals For National Health Insurance In Britain

Revolutionary changes in the general medical services of the United Kingdom have been drafted and approved in principle by the British Medical Association, and legislation to implement the recommendations will be introduced at the next session of parliament.

Main principles of the scheme, which contemplates a new nationwide organization would provide for:

1. A system of medical service directed to the achievement of positive health and prevention of disease, no less than to the relief of sickness.

2. The right of every individual to nominate a family doctor of his own choice.

3. Specialists, laboratory service and institutional care made available to all through the family doctor.

4. Co-ordination of all medical service on the lines of a planned health policy.

The proposed scheme, he said, would be operated through a central controlling body for the whole country which would be independent but representative of the medical profession. Local auxiliary bodies would be created in selected centres.

Apart from those entitled to national health insurance, approximately 20,000,000 members of the population would be embraced in the new proposal and qualify for medical services they never enjoyed before.

## Famous Toy Maker

Man Who Created The Teddy Bear Dies In New York

Morris Michton, 68, Russian immigrant doll maker, whose teddy bear was the childhood joy of millions of Canadians and Americans, died recently in New York.

A pioneer in the North American doll industry, Michton was chairman of the board of the Ideal Novelty and Toy Company, which he founded in 1903, 14 years after he came to New York from Russia, a penniless immigrant.

When he started his business, the teddy bear, his first creation, became an immediate success. He made one of the first unbreakable dolls, then revolutionized the trade with "children" that blinked their eyes.

First President to go beyond the legal boundaries of the United States while holding office was Grover Cleveland. He went out past the three-mile limit while fishing in the Atlantic ocean.

## Will Drill Well At Bearberry

Equipment for the Anglo Canadian Oil Co., who are preparing to  
drill 36 miles west of Olds is moving  
rapidly through town to the well  
site. Trucks heavily loaded with  
drilling tools and equipment have  
been going west daily for the past  
two weeks and it is surmised the work  
is to be rushed before the cold weather  
sets in. —Olds Gazette.

## Bible School Notes

The Committee on Provisions for  
Mountain View Bible School is very  
busy again in making preparations  
for the winter session. Donations  
of various kinds are coming in.  
Previous years have disclosed the  
fact that a number of townspeople,  
and friends in the community desired  
to help, but didn't know what the  
needs were. The school receives  
of donations butter, home-made  
cheese and meat when the school is  
in session. At present the committee  
will be glad to dry corn and peas  
should you have any to spare. During  
the canning season fruit, sugar,  
and pickling vegetables will be very  
acceptable. You may think of other  
donations that the school could  
readily use. This is not an appeal;  
it is a message to the friends not  
ordinarily in touch with the school  
who desire to help in this work.  
Mrs. Noah Swalm, phone 208;  
Mrs. C. J. Hallman, or Miss Gladys  
Eby will be glad to care for any do-  
nations you may bring at any time.

## "Thin Ice," Gay Magnificent And Musical

A gay and magnificent musical that  
skims in shimmering delight along  
the silvery Alpine slopes, snow-  
drenched with dazzling spectacle and  
exciting beauty, heart warming with  
rollicking fun and young romance,  
brings Sonja Henie and Tyrone  
Power together, as you wanted them  
to be, thrilling as you knew they'd  
be, in the Twentieth Century-Fox  
picture, "Thin Ice," which comes  
this weekend to the Opera House.

Topping all her triumphs of "One  
in a Million," Miss Henie is more  
radiantly exciting than ever as she  
displays new beauty, new daring  
and breath-taking thrills.

A delightful romance of mistaken  
identity affording many hilariously  
funny situations, "Thin Ice" con-  
cerns the Romance of a beautiful  
skating star who falls in love with a  
man she believes to be a reporter,  
but who, in reality, is a prince.

Arthur Treacher, Raymond Wal-  
burn and Joan Davis head the im-  
portant supporting cast, which also  
includes Sig Rumann, Alan Hale,  
Leah Ray, Melville Cooper, Maurice  
Caess and George Givot

## LOCAL & GENERAL

day from his vacation, during which  
he attended the Scout Leaders' Camp  
at Waterton Lakes. He also  
spent a few days visiting his home  
at High River.

How about trying one of Scott's  
75c work shirts for the harvest.

Mr. and Mrs. John Metzgar of  
Rossland, BC, are visiting old neigh-  
bors and friends in the district this  
week. The Metzgars are old timers  
in this district, coming here in 1906  
and living here for 21 years.

Mr. W. Spence was on duty again  
at Jenkin's Groceteria after two  
weeks' vacation at Sylvan Lake and  
the Orkney district. Mrs. Spence  
and Barbara who had been spending  
a month at Sylvan Lake also re-  
turned home.

Rev. F. E. Martin of Medicine  
Hat stopped in at the Pioneer Office  
for a short visit with his two grand-  
sons, Harold and Lloyd Erb, on  
Monday afternoon while on his way  
home from a business tour of central  
Alberta.

## Burnside Notes

Lone Pone W. I. met with Mrs.  
Helen Birdale on Thursday last  
with a large attendance of members  
and visitors. Miss Marie Chambers  
was present and talked on cosmetics  
and their use. She also gave some  
information on the "Chick Serum"  
for the disease of horses so prevalent  
at present. Mrs. H. Richardson  
gave an account of her visit to the  
Farm Womens Week at Olds. An  
auction sale of various articles with  
Mrs. N. Eckel as auctioneer adding  
much merriment to and also finan-  
cial aid to the W.I. funds. Mrs.  
Huggert won the draw. In the  
competition of table bouquets Mrs. W.  
Lyons won 1st and Mrs. W. McCul-  
loch 2nd, and Mrs. Bert Pross 3rd.  
The next meeting will be held at the  
home of Mrs. Wm. Lyons on Sep-  
tember 8th.

Mr. and Mrs. Otto Bittner were  
Sunday visitors with Mr. and Mrs.  
Jim McCulloch.

Fullerton, were Friday afternoon  
callers at Mrs. N. Eckel's.

Mr. and Mrs. N. H. Halton and  
daughter, of London, England, are  
visiting his brother Mr. J. W. Halton  
and family. Mr. Halton is European  
representative for the Toronto Star.

The body of Betty Schnaidt, a  
niece of Mrs. W. J. Schiedt, who  
was kidnapped on July 28th was  
found four days later bound hand  
and foot, a gag thrust in her mouth  
and a towel tied around her neck.  
Her body was found 150 miles from  
home at Sioux Falls hidden in a  
clump of weeds and willows.

The kidnapper, Earl Youngs, was  
a long term convict who had es-  
caped from the Pennsylvania Peni-  
tentiary on May 18th and had carried  
on serious crimes against young  
girls. After travelling across four  
states he was recognized from his  
picture by a hotel clerk in Arkansas  
who reported him to police. He  
resisted arrest and tried to shoot his  
way out, but was shot and seriously  
wounded and died shortly afterward.

Betty was a 17-year old high  
school graduate and was taken from  
a neighbor's house, where she was  
caring for little 5-year old Jackie  
Nelson, whose parents were away

For best values in all lines of
